Is there a difference in privacy for students between the free version and Soundtrap for Education?

Yes. The free version of Soundtrap is not designed to comply with COPPA and it does not offer any privacy features such as Walled Garden and Restricted Profiles. The teacher's admin panel is not included in the consumer version either.

Do you collect student data, including metadata?

With Restricted Profile activated, your students will only be able to provide their first name, and the first initial of their last name. No other information can be submitted to us. With Walled Garden activated, users outside your Walled Garden can neither search for, find, view, nor interact with your students. Our system will, however, collect data about your operating system, web browser version, and keep a log of actions performed on our site. This is solely for the purpose of operating our service and to understand which features to improve or add. This data is completely anonymized, as there is no interest for us to know the identity of our users.

Do you share data with third party companies, and is the data used for advertising purposes? No. We have no intention of doing that in the future either.

Will my Soundtrap for Education subscription be auto-renewed each year?

If you use a credit card as payment method, your Educational Subscription and payment will automatically renew at the end of the applicable subscription period, unless you cancel your Educational subscription at least 24 hours before the end of the then-current subscription period. If you use another payment method, your payment will not renew automatically and your Educational Subscription will cancel automatically at the

end of your initial subscription period. In both cases. The cancellation will take effect the day after the last day of the current subscription period, and you will have no continued right to use the Service thereafter. If you cancel the Educational Subscription before the end of the current subscription period, we will not refund any subscription fees already paid to us.

Which devices and operating systems are supported?

Soundtrap for Education works on Windows PCs, Macs and Chromebooks, as well as Android and iOS devices. All you need to do is to go to <http://soundtrap.com> – no installations or downloads are necessary, as Soundtrap runs directly in your browser. For Chromebooks, Soundtrap for Education is available on the Google Play for Education store. Standalone apps for Android and iOS are under development.

What are the hardware requirements?

Soundtrap for Education will successfully run on all available Windows PCs, Macs, Chromebooks and iOS devices on the market that are not older than 5 years. For Android devices, we recommend using devices that are purchased within the last 3 years. Performance on these devices will vary, however, depending on their technical specifications, and how Soundtrap for Education is being used. Recording audio and using loops do not require high-end hardware, for example, while using the built-in virtual instruments and sound effects will require a slightly stronger computer or device. You can easily evaluate whether or not your hardware's performance is satisfactory just by using the free version of Soundtrap.
